Quick Start Guide

I HAVE A METAMASK WALLET

Step 1: Connect Metamask Wallet on the Rebase dApp by clicking on the [Connect Wallet tab](#) - link has been set up when you press connect

Step 2: Choose the Metamask Wallet Icon (Fox)

Step 3: Click Next

Step 4: Click Connect

Step 5: Click Sign

Your wallet is now connected to the Rebase dApp and you can transact

DEPOSITING OR BONDING FUNDS

Step 1: Go to the transact tab on the Rebase dApp

Step 2: Click on Bond

Step 3: Choose which paired pool you want to bond funds - (BTC.USDT) (ETH.USDT)

Step 4: Enter in the amount to Bond; e.g.: \$50 to BTC and \$50 BTC

Step 5: Click Bond again

 Congratulations you have now made a deposit

I DONT HAVE A METAMASK WALLET

Step 1: Download the Metamask Extension on Google Chrome by clicking this [Link](#)

Step 2: Select "Install Metamask for Chrome"

Step 3: You will be redirected to the Chrome Website, Select "Add to Chrome" install button

Step 4: Once the wallet has been installed you will be redirected to the "Welcome to Metamask" page

Step 5: Click "Get Started"

Step 6: Click "Create a wallet"

Step 7: Type in a password

Step 8: Click on "Create"

Step 9: A " Secret Recovery Phase" or "Seed phrase" will be given to you.

It is very important that you copy and save this "Phrase" and keep it safe. Do not give it to anyone as they can access your funds with it.

Step 10: Once you have copied the "Seed phrase", Click "Next"

Step 11: Enter the "Seed phrase" in the correct order and select "Confirm"

 Congratulations you have now set up your Metamask Wallet

Metamask Wallet Creation

MetaMask Installation and Wallet Creation

i **What is MetaMask?** : MetaMask is a browser wallet. It is simply a crypto wallet that lives in your browser like Google Chrome. MetaMask allows you to connect your wallet to any crypto based website and interact with it.

1. To start, download the MetaMask extension [here](#).
2. Select Install '**MetaMask for Chrome**'.

Chrome

iOS

Android

Install MetaMask for your browser

The screenshot shows the MetaMask browser extension interface. At the top, it says "Main Ethereum Network". Below that is "Account1" with the address "0x5e...5924". It displays "1 ETH" and "\$300,000.00 USD". There are "Deposit" and "Send" buttons. Underneath, there's a "History" section with a transaction entry: "#3 - 4/1/2019 at 11:30" showing a "Sent Ether" transaction with a green "CONFIRMED" status and "- 3 ETH - \$600 USD". To the left of the interface, there are decorative abstract shapes: a green wavy line, a yellow circle, and a blue circle. To the right, there are more abstract shapes: a yellow triangle, a blue circle, and a green circle. Below the interface is a blue button with the text "Install MetaMask for Chrome".

3. You will then be redirected to the Chrome web store. Select the "**Add to Chrome**" install button.

The screenshot shows the MetaMask extension page on the Chrome Web Store. At the top, it says "Home > Extensions > MetaMask". The main title is "MetaMask" with a fox icon. Below it, it says "Offered by: <https://metamask.io>". It has a rating of "★★★★★ 2,450" and "Productivity | 10,000,000+ users". To the right is a blue "Add to Chrome" button. Below this, there are tabs: "Overview" (which is selected), "Privacy practices", "Reviews", "Support", and "Related".

4. Once the wallet has installed you will be redirected to this page:

Welcome to MetaMask

Connecting you to Ethereum and the Decentralized Web.

We're happy to see you.

[Get Started](#)

**Select get started

Select "Yes, let's get set up!".

New to MetaMask?

No, I already have a Secret Recovery Phrase

Import your existing wallet using a Secret Recovery Phrase

Import wallet

Yes, let's get set up!

This will create a new wallet and Secret Recovery Phrase

Create a Wallet

If you already have a Metamask wallet you can import it with your seed phrase

Next create a **strong** password.

METAMASK

Congratulations! You now have a MetaMask wallet.

METAMASK

Congratulations

You passed the test - keep your Secret Recovery Phrase safe, it's your responsibility!

Tips on storing it safely

- Save a backup in multiple places.
- Never share the phrase with anyone.
- Be careful of phishing! MetaMask will never spontaneously ask for your Secret Recovery Phrase.
- If you need to back up your Secret Recovery Phrase again, you can find it in Settings → Security.
- If you ever have questions or see something fishy, contact our support [here](#).

*MetaMask cannot recover your Secret Recovery Phrase. [Learn more](#).

All Done

Seed Phrase's

The importance of your Secret Recovery Phrase

What is a Seed phrase?

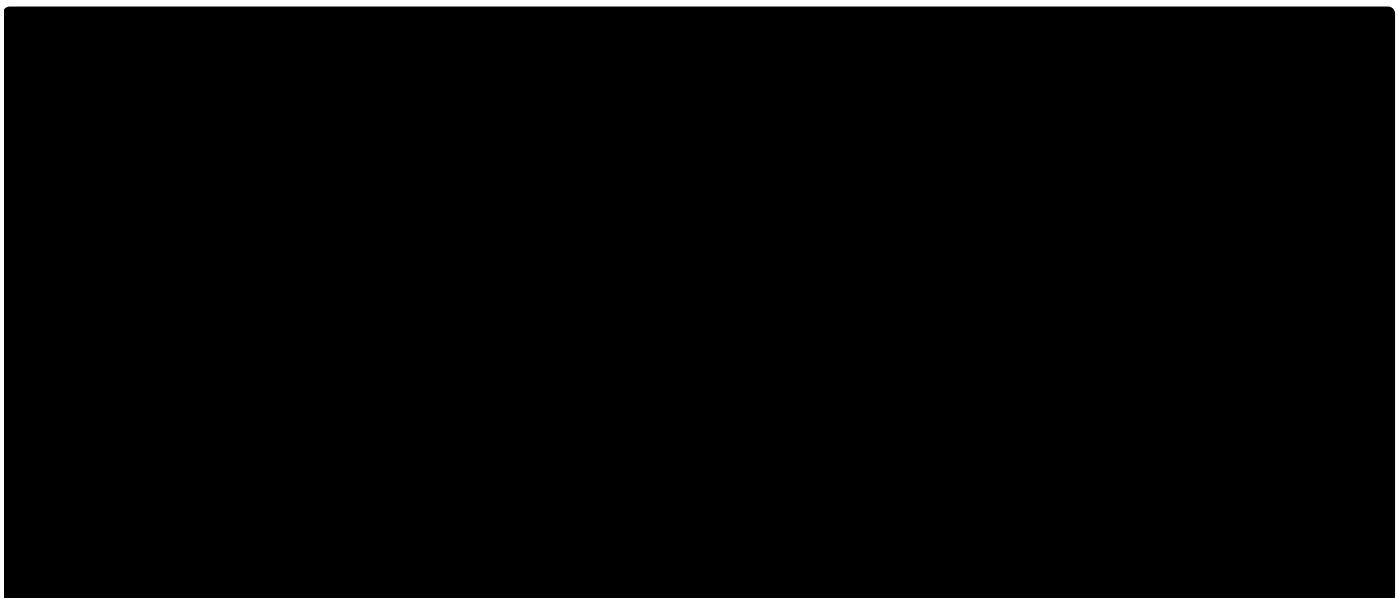

A seed phrase is a group of random words generated by your crypto wallet when you first set it up. It consists of a 12 word secret recovery phrase. It provides access to all your accounts within your wallet.

Why is it important?

It is incredibly important to keep a record of these words. If you lose your seed phrase you cannot recover your funds from your wallet. There is no way to resend your seed phrase to you.

Connecting to the dApp

-  **What is a dApp:** A dApp is a Decentralised Application. In short it is an application like any other however it is built on the blockchain and can be utilised to perform crypto related actions.

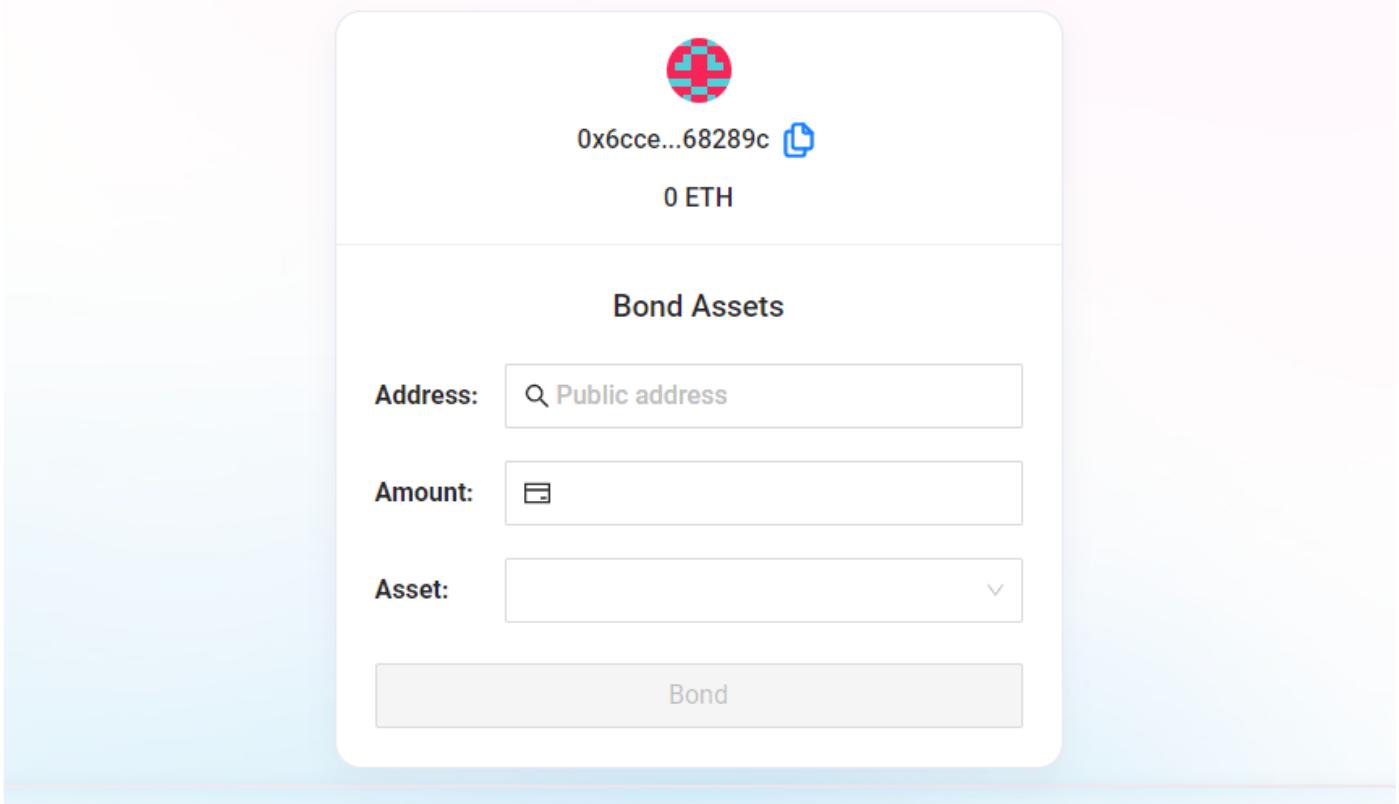

1. Click [here](#) to access the Rebase dApp

You will be redirected to this page:

[Transact](#) [Dex](#) [Fiat](#) [Balances](#) [Transfers](#) [Reporting](#)

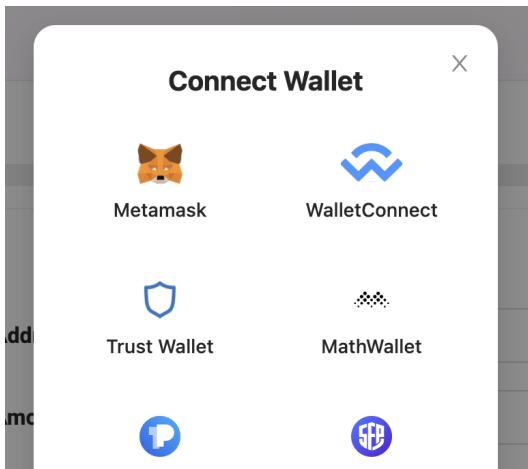

2. Connecting your MetaMask to the dApp

Select the **Connect Wallet** tab in the top right of the screen:

Connect Wallet

You will be prompted to choose a wallet, select **MetaMask**.

Rebase will then ask permission to connect to MetaMask.

1 of 2

Connect With MetaMask

Select the account(s) to use on this site

New Account

Account 1 (0x9d1...b582)
0 ETH

Cancel Next

Next, click **Connect**.

< Back 2 of 2

<https://wngef9ieempty.usemoralis.com>

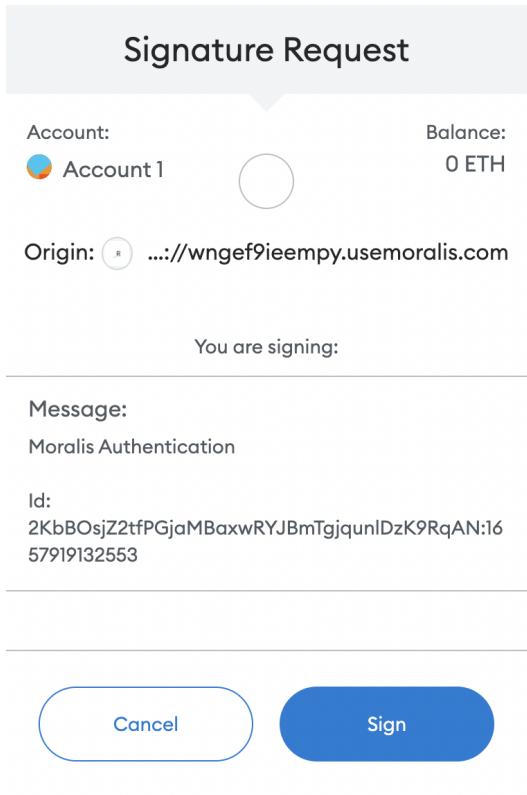

Connect to Account 1 (0x9d1...b582)

Allow this site to:

See address, account balance, activity and suggest transactions to approve

Cancel Connect

Finally you will be asked to **sign** the connection, click **sign.**

You will then see the following in the dashboard.

✓Congrats, you are now connected to the dashboard!

Rebase dApp

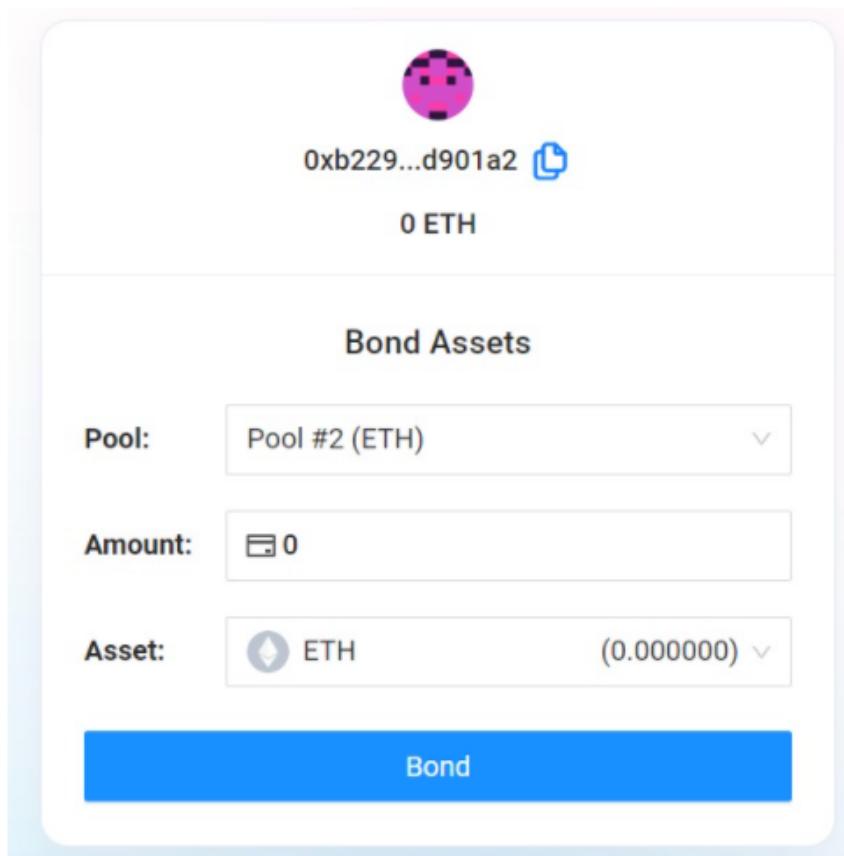

Transact

-  **Good to know:** Within the transact tab you can bond funds to pools and withdraw funds directly to your MetaMask.

Bond

Pools: There will be a choice of 3 pools for bonding funds. ETH, BTC and USDT.

Choose the Pool you are wanting to transfer your funds into, the amount you are wanting to transfer, the asset and then press bond.

Withdraw

Dex

-  A Dex is short for a Decentralised Exchange. The Rebase Dex gives you over \$55 billion of liquidity to trade assets.

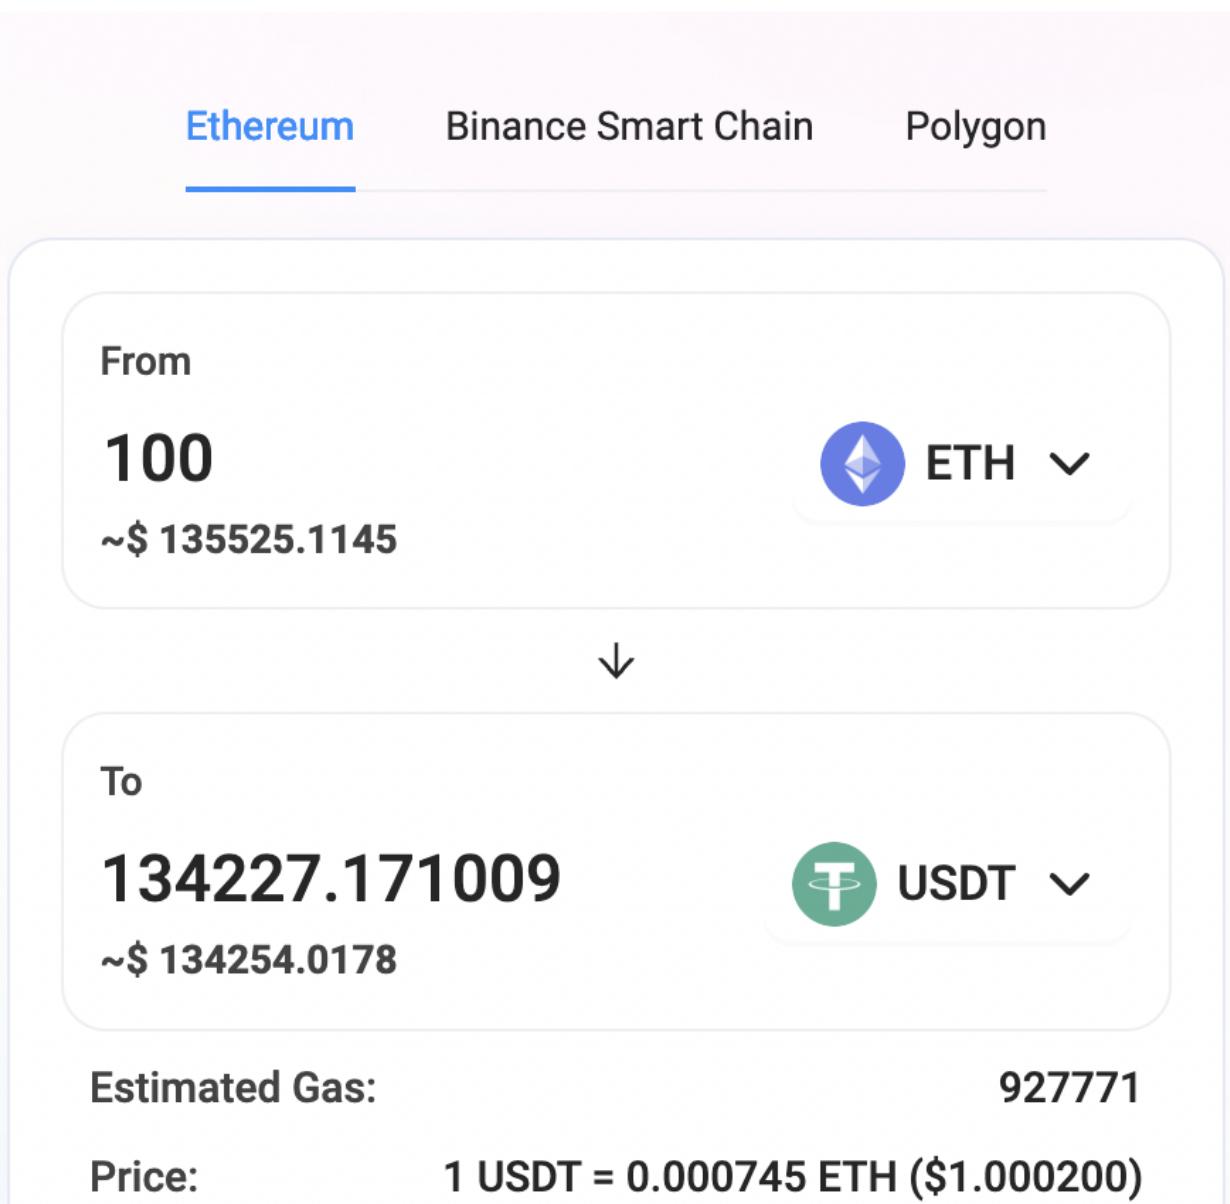

When using the Dex, you can trade over 3 chains:

- ETH
- Binance Smart Chain
- Polygon

Simply choose the asset you want to swap from and to. To search for an asset out of the 200+ available assets press **ctrl "F"** and type the asset name.

Once you have chosen your desired asset select swap and confirm the transaction when the Metamask notification appears.

Once the transaction has been confirmed in the blockchain (usually a couple seconds) the asset will appear in your Metamask account.

The screenshot shows the Rebase Dex interface for swapping assets between Ethereum and Binance Smart Chain. The top navigation bar has tabs for Ethereum, Binance Smart Chain, and Polygon, with Ethereum currently selected. The main area shows a swap transaction with the following details:

From	To
100 ETH ~\$ 135525.1145	134227.171009 USDT ~\$ 134254.0178

Below the transaction details, the estimated gas cost is listed as 927771 and the price is given as 1 USDT = 0.000745 ETH (\$1.000200).

Swap

Fiat

i **Good to know:** The _Rebase fiat gateway is managed through Onramper. Onramper finds the best rate for a swap from fiat to crypto.

⚠ Please note : When swapping from fiat to crypto using a credit/debit card, fees are relatively high.

✓ Rebase does not add any fees or receive any-kickbacks when you use the fiat gateway.

When you have entered the desired amount of fiat you want to use to purchase crypto, select buy and follow the steps provided by onramper.

Balance

Your balance tab is a summary providing the token name, the currency symbol, the balance in your wallet and your metamask address.

Rebase Transact Dex Fiat Balances Transfers Reporting

Ethereum 0 ETH 0x9d18...c5b582

Name	Symbol	Balance	Address
USD Coin	USDC	10000.00	0xa0b...6eb48

< 1 >

For support or queries, please click [here](#) and open a ticket on Discord.
Copyright © 2022 Rebase. All rights reserved.

Transfers

Transfers will show the history of every movement of money done between networks, the value of those transfers and it will give you a TX Hash for each transfer done.

Under the Token heading, an address will be recorded. This address allows Metamask to know exactly which coin is being used in the transfer. It is like a coin ID address.

Rebase Transact Dex Fiat Balances Transfers Reporting

Ethereum 0 ETH 0x9d18...c5b582

Token	From	To	Value	Hash

< 1 >

Reporting

Reporting will consist of a dashboard showing values, volumes and a transactions history.

Reporting Dashboard

The Reporting Dashboard shows numerical value in USDT as well as a graph depicting those current values. It will have a date range that can be adjusted to whatever date range one wants it to appear on the dashboard.

It will have a members investment balance, volume in USDT and BTC, Current Value and Daily Profit.

Transaction History

The Transaction History will give a summary of the date of the transaction, the date it was processed, the type of transaction requested, the amount of the transaction, it will also give this amount in volume in both USDT and BTC.

A screenshot of the Rebase mobile application interface. At the top, there is a navigation bar with tabs: 'Rebase' (selected), 'Transact', 'Dex', 'Balances', 'Transfers', and 'Reporting'. To the right of the tabs are two small buttons: one showing the number '0' and another with a copy icon and the hex code '0x9d18...c5b582'. Below the navigation bar is a section titled 'Transaction History'. This section contains a table with three rows of data. The table has columns for 'Instructed Date', 'Processed Date', 'Transaction Type', 'Amount', 'Volume (USDT)', and 'Volume (BTC)'. The data in the table is as follows:

	Instructed Date	Processed Date	Transaction Type	Amount	Volume (USDT)	Volume (BTC)
1.	Jun 19, 2022	Jun 20, 2022	Withdrawal	R15,000.00	1000	0.048545
2.	Jun 16, 2022	Jun 17, 2022	Deposit	R10,000.00	2000	0.097697
3.	Jun 13, 2022	Jun 14, 2022	Deposit	R50,000.00	2000	0.090063

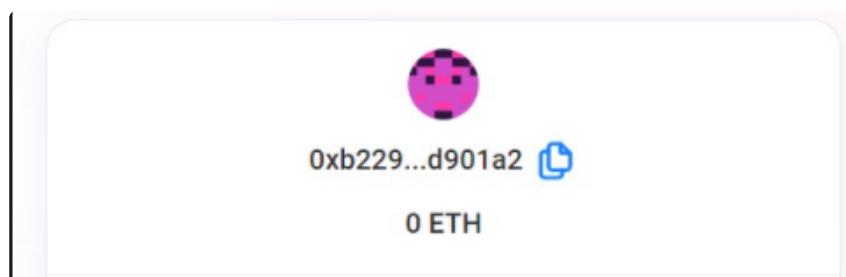

Pools

What are _Rebase pools?

Rebase Pools allow for one to receive trading rewards and to bond funds. Rebase has 3 pool options USDT, ETH and BTC.

How to use _Rebase Pools

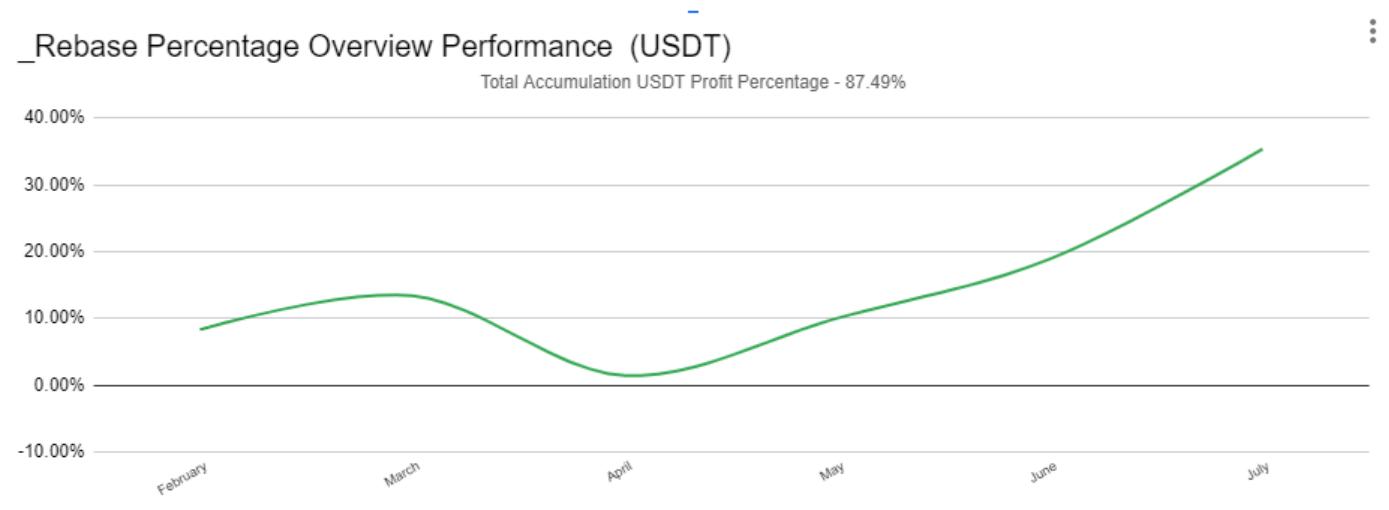

Choose the Pool you are wanting to transfer your funds into, the amount you are wanting to transfer, the asset and then press bond.

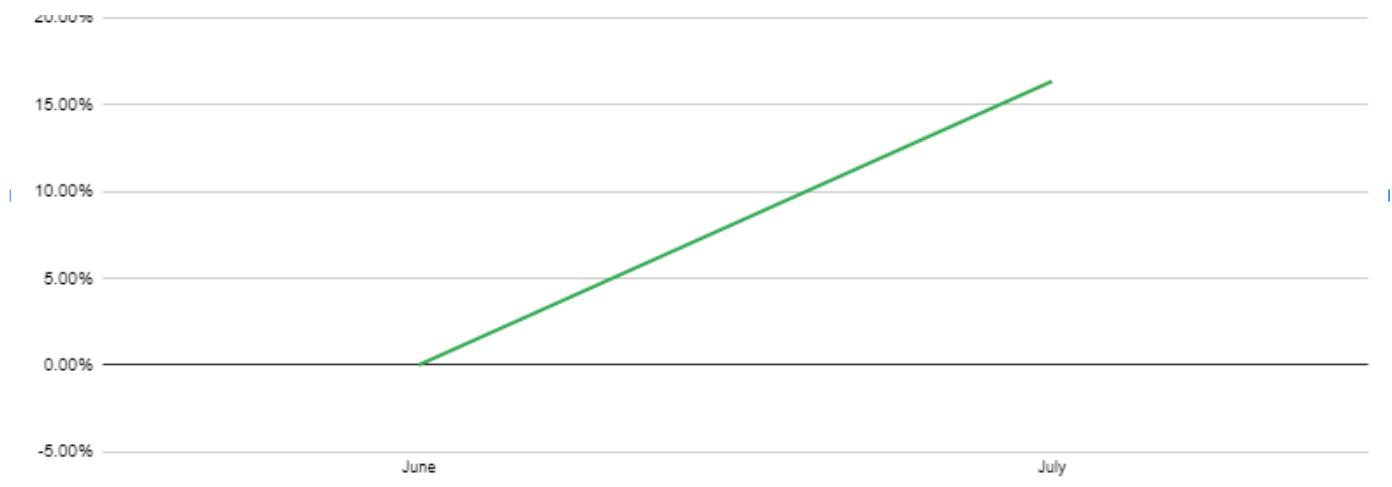

Bond Assets

Pool:	Pool #2 (ETH) ▼
Amount:	<input type="text" value="0"/> 0
Asset:	▼ ETH (0.000000) ▼

Social

Discord Channel

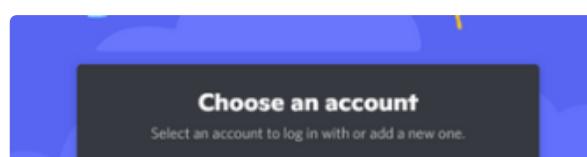

Discord is a free communications app that lets you share voice, video and text chat, similar to that of Whatsapp. It is a platform where one can become part of the Rebase community and share ideas, queries, comments, feedback and interact with other members that are also invested in Rebase.

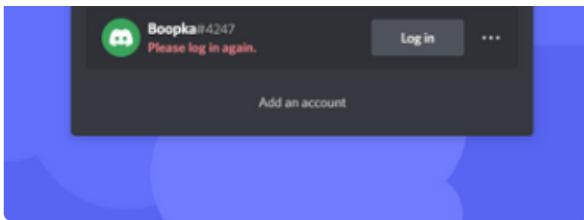

How to download Discord

Step 1: Follow the steps set out below to set up your Discord App - Click this link to get started [Discord Link](#)

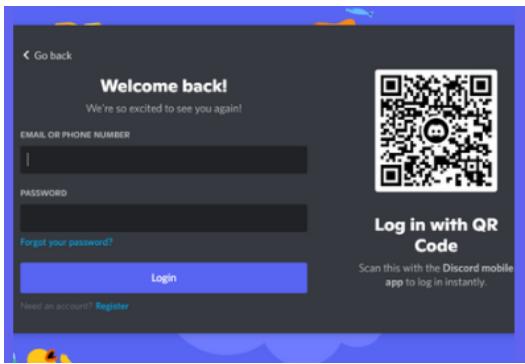

Step 2: Choose to Add Account.

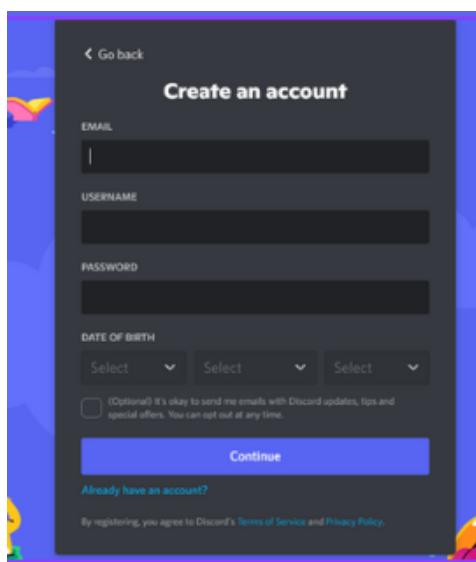

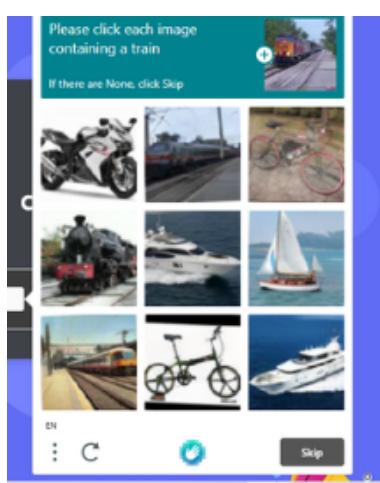

Step 3: Press Register at the bottom of the page.

Step 4: Enter your email address, your username and password, date of birth, tick the box and press continue.

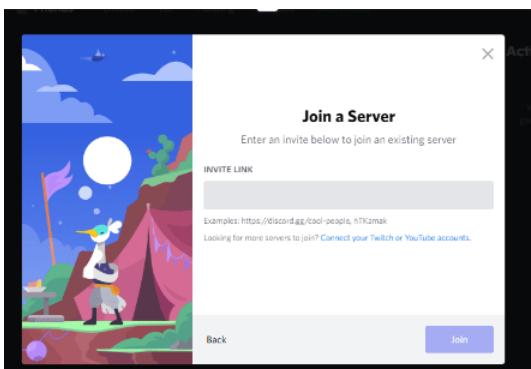

Step 5: Click on the images that come up and continue.

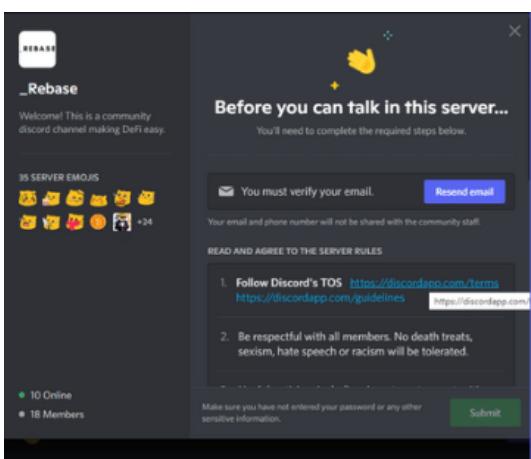

Step 6: It will ask to enter an Invite Link, copy and paste the following link into the bar

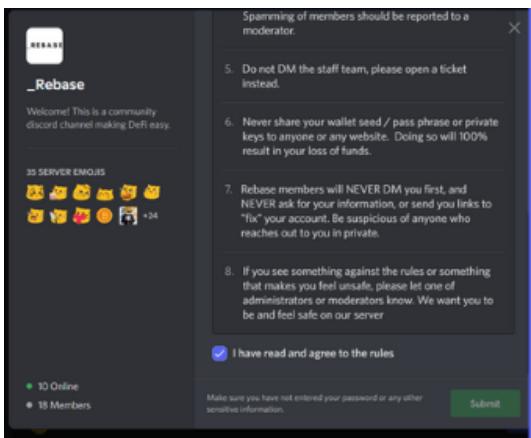

<https://discord.gg/BrHnWBGX> or click the link and accept the invite.

Step 7: Nearly there!! You will need to verify your email address and accept the rules and then you're done.

Step 8: Tick the box that accepts the Rules and click Submit.

You are now a member of DISCORD. Welcome.
